Provide improvements in light industry products Cuban

24 October 2016 / Agencia cubana de noticias

Havana, Dec 23 (AIN) Renovations several products of the Ministry of Light Industry (MINIL) were announced today at the Cuban Parliament by the Commission for Assistance to Industry and Constructions. Angel Enrique Garate, deputy minister in this sector, informed the deputies the addition of fluoride toothpaste of the basket, from the first quarter of 2009. Another decision is marketing MINIL in national currency by networks of Ministry of Internal Trade of the production of toothbrushes.

Referring to the basket, Garate said that from the first three months of next year mothers will have a new module in the design of the bags, made by the company Thaba, more practical use. new bottles for solid cream and baby oil is also produced, which have better presence and durability, said the deputy minister. Elsa Valle, deputy of the municipality of Cardenas, Matanzas, called MINIL to give higher priority to the rural sector, key to increasing food production for the population. In response to resolutions of the last committee meeting, the governing body of light industry introduced a new line of hair treatment with a Brazilian company, which includes four types of products: shampoo, conditioner, styling creams or desrizar.
